2025 High School YRBS

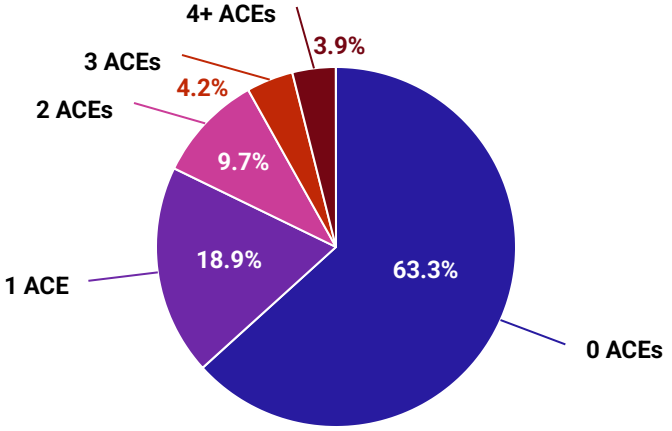

Nevada

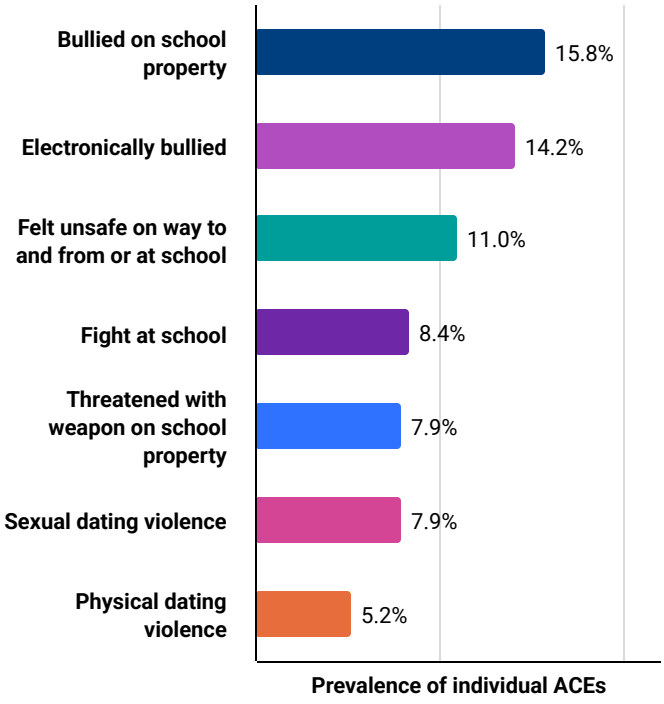

The influence of school/peer adverse childhood experiences (ACEs) and positive childhood experiences (PCEs) on mental health

Findings from the 2025 Nevada High School YRBS (n = 4,945; <18 years old)

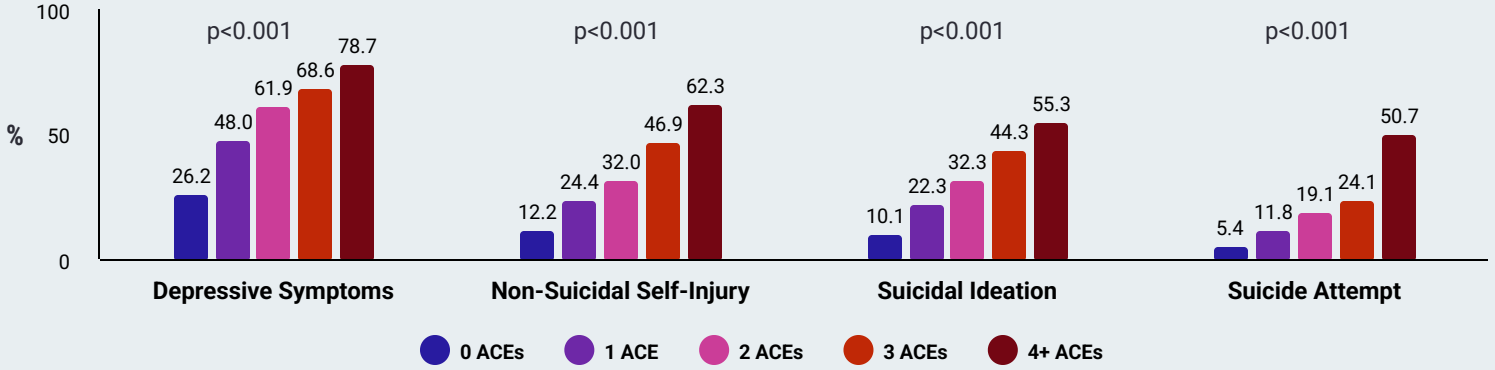

ACEs are potentially traumatic events that occur before the age of 18 years. School/peer ACEs include peer victimization and feeling unsafe in the school environment.

PCEs

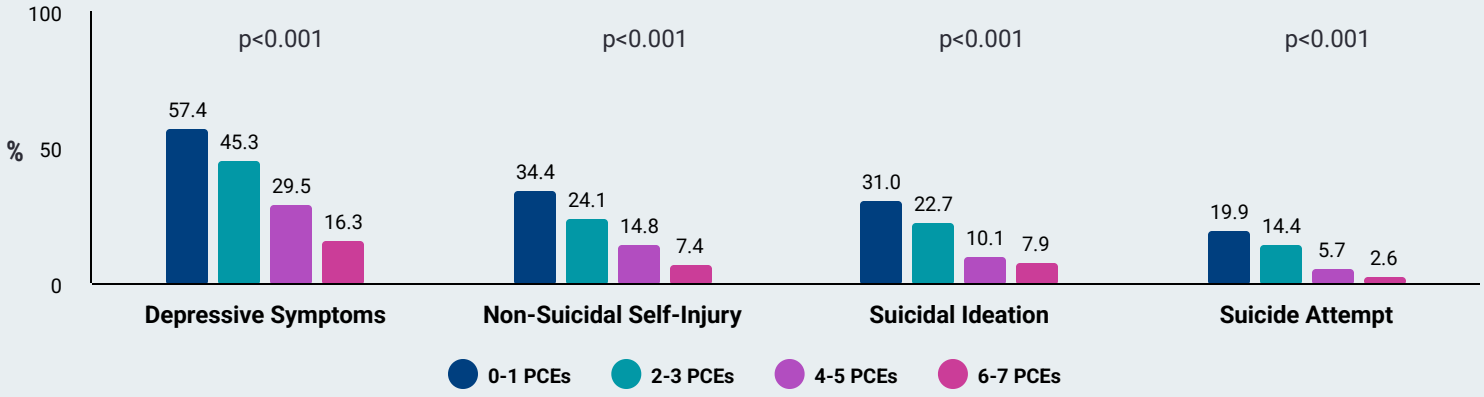

PCEs are positive experiences during childhood, including having safe, stable, nurturing relationships and environments. PCEs include connectedness, security, and constructive use of time. PCEs may offer protection against school/peer ACEs.
